Education	**B.Tech (Hons.)** SRM University AP (2019 - 2023) Computer Science Engineering, Specialization in Cloud Computing CGPA: 9.10/10, till 5th Semester **Senior Secondary (XII)** FIITJEE International School, Vijayawada, Andhra Pradesh (2017 - 2019) AP STATE BOARD board CGPA: 9.73/10 **Secondary (X)** India International School, Sharjah, UAE (2015 - 2017) CBSE board CGPA: 10/10
Projects	*Expense Management System - Splitto* A website designed with MERN stack to facilitate its users manage group expenses and keep a track of their expenses through reports and entries. *Report* Integration of student gestures and facial emotion recognition to virtual meeting platforms along with the statistics of their concentration level during the class. *Fund The World Website* An all in one website for donations of any type where any verified organization can ask for donations which are connected to a payment gateway. This website helps interested donors to easily access the website with an account and easily find all types of donations in one place. This project inspired me to do something meaningful and helpful with my skills and I am trying to work on it to improve it to be more unique.

Hostel Management System
A website that manages all the aspects related to a student hostel where the admin gets access to core functions of the website. It makes hostel room booking easier for students and helps them manage their accounts in the future. This project helped me get a grasp on the concepts of databases and link it with a website.

Online Auction Application
An application where customers can bid on pre-registered (by sellers) auctioned items in a period of time and the product with the highest bid gets sold. This app used a GUI interface which helped me polish my design skills along with coding skills.

K-Map Solver
A project to solve karnaugh maps using concepts like vectors and backtracking algorithm to make it easy and save time for the user. This project helped me gain experience in using and creating algorithms for a problem.

Work Experience

Web Developer Intern at Luxurion World (May 2021 - July 2021)
Worked as a web developer intern at Luxurion world using the Shopify platform to customize a theme from scratch to suit the owner's requirements. Worked on various modules related to CSS, HTML, and liquid languages. Also worked on Instagram API integration with the website. Finding bugs and fixing them was a major challenge to overcome during the internship.

Team Leader at AIESEC in Amaravathi (Feb 2021 - July 2021)
Worked as a team leader leading a team of 6 members to train and guide them during their work period to form international relations with members of AIESEC from many countries like Brazil, UAE, Turkey, Tunisia, Egypt, etc. Came up with strategies for business development and improving the number of students having a life-changing experience through AIESEC. Also facilitated a small-scale event that focuses on SDGs to bring awareness to the public.

Vice President PR and Marketing at AIESEC in Amaravathi (Oct 2020 - Nov 2020)
Worked as Vice president for PR and Marketing for a large-scale event " Technological Business Hackathon 1.0" to get partnerships for the event and increase the number of sales. Came up with strategies to attract customers using unique concepts and eye-capturing graphic designing skills. The event had a turnover of Rs.60,000 & partnerships with some renowned companies and a reach of up to 5,000+ students. Our team got recognized as the best team of the semester by AIESEC in Hyderabad.

Member at AIESEC in Amaravathi (Aug 2020 - Feb 2021)
AIESEC is a worldwide youth-run organization helping students to gain leadership skills through international internships and volunteering opportunities. Worked as a member and learned to build international relations with members of AIESEC from different countries and worked in synergy with OGTa Hyderabad for many projects. Conducted market research, workshops, generated leads and ensured value delivery.

Skills

Computer Languages - HTML, PHP, Python, JavaScript, C, C++, CSS, Java, Shopify-Liquid, React JS, Node JS, MySQL
Frameworks - Bootstrap, Oracle
Other Skills - Content creation, Video editing, Marketing, Sales, Adobe photoshop

Interests

Cloud Computing
Entrepreneurship
Graphic designing

Certifications

Oracle Cloud Infrastructure Foundations 2021 Associate
Introduction to Cloud by IBM
Introduction to Hadoop by IBM

Achievements

Winner of photography competition
Won first prize in a photography competition conducted by SRMAP which was
themed "Landscape".

Finalist for Hack Gujarat
Built a website called "Fund The World" with an all-girls team and was one of the
finalists of the hackathon.

Best sustainable member award
Received an award for making sustainable decisions and acting on them throughout
the period at AIESEC in Amaravathi as a member and bringing awareness about it
among many students.

Extracurricular Activities

Content creation - Life Captured Channel
My family and I started a YouTube channel featuring all types of videos (fashion
hauls, product reviews, travel vlogs, challenge videos, and many more). Our channel
got monetized recently and our next goal is to make it reachable to more people. This
channel helped me speak up more and improve myself by making better content every
day.

Volunteer for Tech Fest at SRMAP 2019
Volunteered for the techfest conducted at SRMAP to guide the participants and to
oversee the events during the day.

Mentor for TBH 1.0
Mentored Technological Business Hackathon conducted by AIESEC in Amaravathi
where I helped the participants with doubts related to their projects for the hackathon
and guided them accordingly.

Languages

English - Native / Bilingual Proficiency
